

Instructions: Read the Sources and answer the questions
Source 1

In most countries, the number of women working in paid employment is increasing. More married women are going out to work. It is becoming more acceptable for a woman to be employed outside of the home.

During the twentieth century, more women started working. Today, many women around the world want jobs and careers. However, men and women are still not treated equally in the workplace.

Some reasons why men and women are not equal at work.

Mothers in Cambodia feeding their children

A male manager leading a meeting in Europe

Women spend more time than men caring for children and the family

In many cultures, men and women have different roles at home.

Men usually have top jobs and choose who gets employed.

Girls do not always have the same chance to go to school as boys.

Having babies can affect women's health and time at work.

There is not enough childcare, and it is expensive.

There are not enough laws to protect women at work.

Question 1

According to Source 1, how has women's paid employment changed over time?

Question 2

Using Source 2, give two reasons why men and women are not equal at work.

Question 3

Which reason for men and women being treated differently at work do you think is the most important? Explain why.

Question 4

What trend is happening in most countries?

- a. fewer women are working in paid employment
- b. more women are working in paid employment
- c. only unmarried women are working in paid employment
- d. women are leaving their jobs because they are tired

Question 5

What has become more acceptable?

- a. women staying at home only to take care of the family
- b. children are employed more
- c. men staying at home
- d. women working outside the home

Question 6

When did more women begin working?

- a. in the nineteenth century
- b. in the twenty-first century
- c. during the twentieth century
- d. during ancient times

Question 7

What problem still exists in the workplace?

- a. women earn more than men
- b. men and women are treated equally
- c. there are no jobs available
- d. men and women are not treated equally

Question 8

- a) In most countries, the number of women in paid _____ is increasing.
b) More married women are going out to _____
c) Men and women are still not treated _____ in the workplace.

Source 3

We need more women in management. Research in the USA shows that companies with more than 30% women managers make 15% more profit. Companies with women on their boards are often more efficient and careful with resources. Employees say women leaders are good at teamwork.

They support others, help people finish tasks, and are great mentors.

Studies also show women communicate better, and employees understand and value company plans more when women are leaders.

Women's skills and qualities are needed in the workplace!

Question 9

Study source 3

"We need more women in management." What are the good points and the weak points of this idea?

Question 10

Circle the appropriate answers.

A. According to research in the USA, companies with more than 30% women managers make:

- a. 5% more profit
- b. 10% more profit
- c. 15% more profit
- d. 30% more profit

B. Explain how companies with women on their boards are described.

- a. they are competitive and rude
- b. they are efficient and careful with resources
- c. they are expensive and love to buy good things
- d. they are strict with employees and not friendly

C. What leadership skill is mentioned as a good point of women leaders?

- a. they can work independently only and do not need anyone
- b. they do not like communication
- c. they are strong in teamwork and mentoring others
- d. they make quick decisions without thinking

D. Suggest why employees value company plans more when women are leaders?

- a. because women communicate better
- b. because women do not like so much salaries
- c. because women work fewer hours as they get tired quickly
- d. because women do not like seeing so many people at work

Source 4: An online discussion – working towards gender equality in the workplace Mia

Women are getting more education, so more want careers. But men still have most jobs, and women earn 16% less. Women are often in low-paying jobs and few are managers. In the future, stronger laws are needed to stop discrimination. Businesses should hire equal numbers of men and women, provide free childcare, and allow flexible work from home.

Question 11

Pick one thing Mia thinks will happen in the future. Explain why it is about the future.

KOA

Women Can Succeed at Work

Women control 85% of all shopping, about \$20 trillion, and use money wisely. Skills from motherhood, like leadership and management, help women succeed at work. Government or men's help is not needed.

To get more women into senior jobs, women need confidence. Encourage women to study, get training, and show examples of successful women in management. Women can help each other through mentoring, advice, and guidance. Women in senior positions can use their influence to promote other women. Kitty Johnston says: ***"There is no limit to what we, as women, can accomplish."***

Question 12

Koa argues that women can help themselves to become more successful at work. Identify **one** fact from Koa's statement. (Hint: facts usually have numbers)

Question 13

A. What does Mia believe is needed in the future?

- a. fewer women working as the place of the woman is in the house
- b. Stronger laws to stop discrimination against women
- c. Lower salaries for managers because everyone should be earning the same
- d. Less education for women because they really do not need to be educated

B. According to KOA, women control about how much of global shopping?

- A. 50%
- B. 65%
- C. 75%
- D. 85%

C. What is the believe of Kitty Johnston about women?

- a. women need government support to succeed
- b. women cannot become managers because men are the only graduates
- c. there is no limit to what women can accomplish
- d. women should not work in senior positions because they can't manage people

D. Fill in the gaps

- a) Women earn _____% less than men.
- b) Businesses should provide free _____ to support working women
- c) Women can support each other through _____ and guidance.

Source 5

The United Nations has a goal to end hunger and poor nutrition. Some progress has been made worldwide.

However, over 2 billion people do not always have enough food. In 2021, 800 million people regularly went hungry or did not get enough nutrition.

Causes of hunger and poor nutrition

Poverty and not having jobs

Not enough food

Extreme weather and climate change

Wasting food

War and fighting

Question 14

According to Source 5, how many people regularly suffered from hunger and poor nutrition in 2021?

Question 15

According to Source 5, name two causes of hunger mentioned in the source

Source 6**We are a food charity campaigning against world hunger.**

Pandemics and rising food prices mean that food shortages are affecting more people. Worldwide, about 25 per cent of children do not get the food they need to grow and thrive to become healthy adults and fulfil their dreams. Hunger always destroys health, education and employment.

We must have compassion and care for everyone. We must not ignore their struggle to survive. Join us and bring hope to the hungry. Support our food programmes and help millions every year. Protest about hunger. Donate to the United Nations World Food Programme. When people come together and demand change, extraordinary things happen. Together, we can build a better world where everyone has a right to food.

Adapted from a food charity website accessed in 2021**Question 16**

Identify one reasons in source 6 that causes food shortages.

Question 17

From Source 6, how do you think hunger can destroy education from a student perspective.

Question 18

Which reason for hunger do you think is the biggest problem? Explain why.

Source 8: A radio debate about food production
Grace

There is a revolution in food production. My father is a farmer and he says that more food can be produced so that everyone can eat. New technologies can solve food shortages and hunger across the world.

Self-driving tractors linked to satellites can work all day and night to produce more food. Computers can gather data about the weather and soil conditions. This helps farmers know the best time to plant seeds and use fertiliser. I think that people are hungry because trade is unfair. Big food companies process food to make huge profits. They sell the food to wealthy people in rich countries. Food should be a human right for everyone.

Seth

Industrial farming is not the solution to hunger. It destroys habitats and the environment. Rain forests in South America are being cut down to grow grass for cattle. We lose many plants and animal species, and the soil is harmed. This causes climate change, making food production more difficult.

We need a cleaner, greener approach. Farming should be given back to local people who grow native food crops that reflect their cultures. Traditional crops and composting (Composting are making old food and plants into healthy soil) can improve the soil. The United Nations World Food Programme supports this approach. Everyone can help by eating responsibly, eat enough, not too much! Choose organic food without chemicals. Eat less meat because plants need less energy to grow.

Question 19

A. According to Grace, why is new technology important in farming?

- a. it reduces the number of farmers because we don't need many farmers
- b. it solves food shortages and hunger
- c. it stops climate change completely and the world will have the perfect climate
- d. it ends international trade between countries

B. How do self-driving tractors help farmers?

- a. they reduce food prices because they are hardworking machines
- b. they sell food to rich countries because poor countries cannot afford to pay
- c. they can work day and night using satellite links
- d. they replace fertilisers as they can work without fertilisers

C. According to Seth, what is one disadvantage of industrial farming?

- a. it makes the soil very good for planting
- b. it protects the forest and the trees
- c. it destroys habitats and harms the environment
- d. it reduces climate change and make sure the world has the same climate

Question 20 Suggest if the following answers are True **or** False

- 1. A stakeholder is a person or group with an interest in an issue. _____
- 2. Students, parents, and teachers can all be stakeholders in the school uniform issue. ____
- 3. All stakeholders always share the same perspective. _____
- 4. A perspective is a point of view about an issue. _____
- 5. Surveys and interviews can be used to collect evidence from different perspectives. ____
- 6. Graphs are used only to show opinions, not evidence. _____
- 7. Learners may think differently from parents about school uniform. _____
- 8. Qatar supports school uniforms to promote modesty and equality. _____

Question 20 – Research

Research question: Does tourism help or harm local communities?

What is tourism?

Tourism is when people travel to other places for holidays, business or for leisure.

Many cities such as Dubai, London and Doha attract millions of visitors every year

Your task:

- Explain the positive and negative impacts of tourism on local communities and reach a reasonable conclusion.
- Research and write at least 6 facts and 6 opinions about tourism in Qatar, Doha
- Research about how the environment has been affected by the effect of tourists. (pollution, waste, wildlife)
- Explain how tourism has been beneficial for local businesses in Doha
- (souvenirs, hotels, fabric sellers...)
- Suggest how the Culture and Tradition of the citizens have been affected by tourism
- Explain for task using different perspectives

Present your research work here. Remember to include your citing's as you have to give credit to the work that is not yours.
