

**Manarat Al Al Sharjah Private School**  
**Worksheet**  
**Grade 8**

---

1) Today, many students use the Internet and social media every day. **They** visit a website, use an app, and even complete a survey online. They may upload homework, download pictures, or post a comment. Each dot on a graph can show how popular an app is.

2) However, not everything online is safe. Some websites are unsafe, so students must be careful. Teachers give advice about Internet safety. For example, students should not share personal information and should always ask before they send a message to someone they do not know.

3) Many students also learn a foreign language online. Some think grammar is hard, but if they practise, they can improve. They can meet people, talk online, and use a tablet to study. Technology can help students remember new words and enjoy learning.

---

## Questions

**1. What is the main idea of the passage?**

- Driving safely
- Using technology for learning and staying safe
- Food chains

**2. What is the main idea of paragraph 2?**

- Learning grammar
- Internet safety
