- 6 If we don't do something to save the environment soon, we'll _____ out of time!
- 7 _____ power uses sunlight to create energy.
- 8 _____ stations cause a lot of pollution.

Read the text, then do the tasks as instructed:

Saving the planet starts with us

Every day, we use things that harm the environment. Plastic bags, cars, and even electricity from non-renewable sources can hurt nature. But we can change this! Recycling is one of the easiest ways to help. People should recycle paper, glass, and plastic. We can also save energy by turning off lights when we leave a room or using public transport.

Another important step is protecting animals and plants. Forests are being cut down, and animals lose their homes. We need to support national parks and plant more trees. Even small changes matter. If each person starts caring more about the Earth, we can make a big difference.

Tasks

1–6: Choose the correct answer (a, b, c, d):

What harms the environment the most?

- a) Recycling
- b) Walking
- c) Plastic and cars
- d) Using bicycles
