

Read the paragraph to answer the following questions:

During the hot and humid heatwave, the sky turned dark and overcast, suggesting rain. As we went outside, thick mist surrounded us, making it hard to see. Suddenly, heavy rain (downpour) poured down with loud thunder. Small balls of ice, called hail, fell too. But afterward, it became cold and frosty, giving us relief from the heat.

1. What was the weather like during the heatwave?
2. How did the sky look before it rained?
3. What surrounded us outside, making it hard to see?
4. Describe the rain that came suddenly.
5. What fell along with the rain?
6. What gave us relief from the heat afterward?
