Read the following passage and mark the letter A, B, C or D to indicate the correct answer to each of the questions.

Eco-tourism brings curiosity - about both environment and experience. Instead of going to popular tourist destinations like China, Italy, Spain and Germany, vacationers are expanding their searches and destinations.

More destinations mean more opportunities for employment within **indigenous** populations of lower-income communities and countries. Locals act as guides, experts, sellers and hosts to visiting tourists. Increased traffic means more money pouring directly back into the community along with a higher standard of living.

Community tourism allows people from all over the world to come into a poor community and restore **it** by providing services and support. In one aspect, a vacation could mean volunteering, building or serving in a poor community. Another impact would come from engaging experiences in the lives of indigenous peoples that protect their culture and environment.

Plus, taking some press away from the typical tourist destinations means that some pressure is taken off the surrounding environment and ecosystems. The money that results and is saved from releasing the environmental pressures is put back into conservation and preservation efforts.

Read the following passage and mark the letter A, B, C or D to indicate the correct answer to each of the questions.

The pandemic hit the tourism industry with a **steep** 74% decline in international travel. Many countries had lockdowns in place to prevent COVID-19 transmission from foreign places. While this

contributed to a significant drop in carbon emissions in 2020, tourist-dependent nations suffered huge economic losses.

Three years after, the pandemic is finally **winding down** and international travel is continuing, with air traffic set to reach 2019 levels soon. Last year saw a 153% increase in air travel compared to 2021 and about 62% pre-pandemic levels. In 2023, air traffic is expected to continue rising as most countries lift restrictions.

The comeback of tourism means the same will happen in terms of emissions. In 2022, GHG emissions increased by 7% in the first quarter compared to 2020.

It is critical to practise ecotourism as global warming becomes clearer. You'll benefit from learning and becoming a better friend to the environment. Ecotourism comes with many benefits. Firstly, the most significant benefit of ecotourism is educating yourself on environmental issues. If you find ways to be environmentally conscious on your trip, you are more likely to repeat those behaviours at home. Moreover, sustainable travel means using natural and renewable resources to improve the planet's health. You're protecting the environment around you from the negative impacts of travel. If you believe in leaving something better than when you found it, ecotourism is the way to go.
