

Questions 19-22  CH2_HP19-22.mp3

Complete the notes below.

Write **NO MORE THAN TWO WORDS AND/OR A NUMBER** for each answer.

Human Longevity Research

Nature Factors

- scientists searching for longevity gene
 - discovered protein that may reduce the speed of the 19 process
 - critics find study defects : longer lives for humans are not necessarily indicated from a molecular-level 20

Nurture Factors

- scientists found behavioural factors
- 80-year study on longevity tracked environmental and behavioural factors of 21 subjects
 - personality and relationships can help estimate the length of life
 - longer lifespan for careful and determined subjects
 - longer lifespan for those who are 22
