

Classification of Living Things

Answer the questions below.

Characteristic	Protist	Fungi	Animal	Plant	Bacteria
Do the cells have a nucleus?					
Unicellular or multicellular?					
Is there a cell wall?					
Do they make their own food?					

What Kingdom do I belong in?

Bacteria - Animal - Plant - Fungi - Archaea - Protist

1. I am a consumer, because I don't make my own food. I can sense you in many ways.

2. I am a producer, because I make my own food. I have many cells.

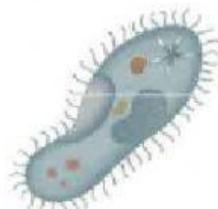

3. I have only one cell, and it has a cell wall. I might be very helpful, or I might make you sick!

4. I am a decomposer, and I don't need sunlight.

5. I am small and I can live in extreme conditions and temperatures.

6. I have a nucleus and organelles.

Circle the organism that would be classified as a plant.

Choose why you chose the organism you circled. What characteristics would cause it to be classified this way?

Choose any kingdom (protist, animal, or fungus) and list 3 characteristics.
