Minh Long: "I think we should choose a _____ because I want to know more about our country."

- A. domestic tour B. package tour C. self-guided tour D. ruinous site

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions.

The Missouri River is a magnificent river in North America. It is about 3,726 kilometres long, making it nearly as long as the Mississippi River. Together, they form one of the longest river systems and a famous natural wonder of the world. The landscape around the river is very diverse, providing a home for many types of plants and fish.

However, the river has many man-made structures like **dams**. There are seven major dams and many smaller ones on the Missouri. These dams use water to produce electricity. They also create **reservoirs**, or artificial lakes, to store water. This water is very important for irrigation, helping farmers grow crops in dry areas. The dams also help people control the water level to prevent natural disasters like floods.

By changing the natural flow of the water, these dams have changed the river's ecosystem. The depth and temperature of the water are now different. This makes it difficult for some wildlife to survive. Today, the biodiversity of the region is **at risk**, and some fish and animals have become endangered species.

In conclusion, the Missouri River is an important part of our nature. We need to find ways to preserve its beauty and protect the habitats of wild animals. Balancing human needs and nature is the best way to keep our earth green for the future.

Question 9. Which of the following is the best title for the passage?

- A. The Historical Development of Major River Systems.
B. The Missouri River: Benefits and Environmental impacts.
C. The Importance of Electricity in North America.
D. The Construction of Large Dams and Reservoirs.

Question 10. Besides producing electricity, what is another function of the dams?

- A. To create more natural habitats for fish.
- B. To control water levels and prevent floods.
- C. To increase the number of wildlife species.
- D. To keep the water temperature constant.

Question 11. The phrase "**at risk**" in paragraph 3 is OPPOSITE in meaning to:

- A. by accident
- B. out of danger
- C. in trouble
- D. under threat

Question 12. How has the construction of dams physically affected the river?

- A. It has changed the water's depth and temperature.
- B. It has stopped the river from flowing into the sea.
- C. It has removed all the pollution from the water.
- D. It has made the Missouri longer than the Mississippi.

Question 13. According to the text, what are "reservoirs"?

- A. Special areas used for protecting endangered species.
- B. Lakes built by humans behind dams to store water.
- C. Small rivers that flow into the Missouri River.
- D. Natural lakes formed by heavy rain and floods.

Question 14. What can be inferred about the wildlife in the Missouri River region?

- A. Some species are struggling because of the new habitat.
- B. Human activities have made the environment better.
- C. The river's ecosystem remains the same as in the past.
- D. All animals have successfully moved to the Mississippi.

Mark the letter A, B, C, or D to indicate the word that differs from the other three in the position of primary stress.

- Question 15.** A. tradition B. religious C. estimate D. majestic
Question 16. A. support B. locate C. occur D. graveyard

Choose the sentence among A, B, C or D that is closest in meaning to the original sentence.

Question 17. The digital camera is very modern. My father bought it for our trip to Da Lat.

- A. The digital camera which my father bought for our trip to Da Lat is very modern.
- B. The digital camera who my father bought for our trip to Da Lat is very modern.
- C. The digital camera whose my father bought for our trip to Da Lat is very modern.
- D. The digital camera that my father bought it for our trip to Da Lat is very modern.
