How to Plant and Maintain a Lawn

Questions:

1. How should I prepare the ground before I start planting my lawn?
2. What do I need to think about when choosing the right kind of grass to plant?
3. After I plant the seeds, how long will it take for the grass to start growing?
4. When can I start walking on the grass after planting a lawn?
5. What time of day is best for watering a lawn?
6. How much water does a lawn need every week?
7. When I cut the grass, should I cut it very short?
8. Is it a good idea to cut the grass right after watering it?

Answers:

- a. You need to understand the weather conditions in your area and the type of soil you have.
- b. It is most effective to water a lawn in the early morning or in the evening.
- c. You can step on the grass when it starts growing, but for 6 months you should step on it lightly.
- d. Lawns should get around 2.5-3.5 cm of water weekly, and in dry seasons – up to 5 cm a week.
- e. No, leave it a little long because longer grass stays healthier.
- f. It usually takes between 10-14 days before the grass begins to grow.
- g. No, you should always wait until the grass dries before you cut it.
- h. You should clean away all the plants from the area where you want to plant the lawn.
