Practice Worksheet – U3M2L1 – Effects of Geosphere

1. An \_\_\_\_\_ volcano is one that is currently erupting or has recently erupted.  
A. Dormant  
B. Extinct  
C. Active  
D. Silent
2. A volcano that has not erupted for some time, but may erupt in the future, is called a \_\_\_\_\_ volcano.  
A. Active  
B. Dormant  
C. Extinct  
D. Dead
3. 3. A volcano that scientists think will not erupt again is a \_\_\_\_\_ volcano.  
A. Active  
B. Dormant  
C. Extinct  
D. Sleeping
4. Most volcanoes are found on the \_\_\_\_\_ floor.  
A. Land  
B. Ocean  
C. Desert  
D. Mountain
5. Scientists concluded that volcanoes tend to erupt where one plate is \_\_\_\_\_ under another plate.  
A. Sliding  
B. Pulled  
C. Pushed  
D. Lifted

6. \_\_\_\_\_ rock is very hot melted rock.
- A. Solid
  - B. Molten
  - C. Hard
  - D. Cold
7. A \_\_\_\_\_ is an area where molten rock from deep within the mantle breaks through to the Earth's crust.
- A. Fault
  - B. Hot spot
  - C. Ridge
  - D. Valley
8. The continents are made up of these pieces called \_\_\_\_\_, which move.
- A. Rocks
  - B. Plates
  - C. Layers
  - D. Crusts
9. At \_\_\_\_\_ boundaries, where two plates push against each other, mountains can form.
- A. Divergent
  - B. Convergent
  - C. Transform
  - D. Parallel
10. \_\_\_\_\_ is an opening in Earth's crust.
- A. Mountain
  - B. Volcano
  - C. River
  - D. Valley
