Before Buying an Electric Car

Questions:

1. Why are electric cars better than gasoline cars?
2. How much do electric cars cost?
3. What is the driving capacity of an electric car's battery?
4. How can I charge the battery of my electric car?
5. What are the advantages and disadvantages of the fast-charging method?
6. Will I ever need to replace the battery of my electric car?
7. Should I lease an electric car instead of buying one?
8. What is a hybrid car?

Answers:

- a. Between \$26,000 and over \$100,000.
- b. It is a car that operates both on gasoline and on electricity.
- c. Plug the car into a household outlet or use a special public charging station.
- d. Yes, you should, because then you can easily upgrade to a better model.
- e. Because they are better for the environment, and they cost less to operate.
- f. On the one hand, it charges the battery quickly; on the other hand, it reduces the battery's lifespan.
- g. Most electric cars can travel 400 kilometers before the battery needs re-charging.
- h. No, because most batteries last for 8-10 years, and by then you will probably buy a new car.
