The Importance of Sleep

Sleep is one of the most important activities for our health, yet many people don't get enough of it. Experts recommend that teenagers sleep between 8 and 10 hours every night, but studies show that most young people sleep only 6 or 7 hours.

Why is sleep so important? During sleep, our bodies repair cells, strengthen the immune system, and process information from the day. For students, this last function is especially crucial because it helps with learning and memory.

Lack of sleep can cause serious problems. Students who don't sleep well often have difficulty concentrating in class, feel tired during the day, and may experience mood changes. In the long term, poor sleep habits can affect academic performance and overall health.

So, how can you improve your sleep? First, try to go to bed and wake up at the same time every day, even on weekends. Second, avoid using electronic devices at least one hour before sleeping, as the light from screens can make it harder to fall asleep. Finally, create a relaxing bedtime routine, such as reading a book or listening to calm music.

Remember: good sleep is not a luxury—it's a necessity for a healthy and successful life.

34. According to the text, how many hours should teenagers sleep each night?

- A. 6 to 7 hours
- B. 8 to 10 hours
- C. 10 to 12 hours

35. What happens to our bodies during sleep?

- A. We forget everything from the day.
