The Future of Renewable Energy

As the world faces increasing environmental challenges, renewable energy sources have become more important than ever. Solar, wind, and hydroelectric power are all examples of renewable energy that can help reduce carbon emissions and dependence on fossil fuels. In the future, solar power is expected to play a key role in meeting global energy demands, as **advancements** in technology make solar panels more efficient and affordable. Wind energy, particularly offshore wind farms, is also gaining popularity as a cleaner and more **sustainable** energy source. Many countries are investing in renewable energy infrastructure to reduce their carbon footprint and combat climate change.

Hydroelectric power, which harnesses the energy of flowing water, is already one of the most widely used forms of renewable energy. However, some experts believe that new technologies, such as tidal and wave energy, could become increasingly important in the future as they offer reliable and consistent energy production. These innovations could complement existing renewable energy sources and help meet the growing energy demands of the future.

Question 31. What is the main idea of the text?

- A. Renewable energy is becoming essential for addressing environmental challenges.
- B. Fossil fuels are still the primary source of global energy.
- C. Hydroelectric power is the most widely used energy source.
- D. Solar power is not a reliable energy source in the future.

- A. Developments
- B. Challenges
- C. Barriers
- D. Risks

Question 33. Which word is OPPOSITE in meaning to "**sustainable**" in the text?

- A. Reliable
- B. Renewable
- C. Non-renewable
- D. Clean

Question 34. Which of the following is NOT true according to the text?

- A. Solar power is expected to play a major role in future energy production.
- B. Offshore wind farms are gaining popularity due to their sustainability.

- C. Hydroelectric power is the only renewable energy source in use today.
- D. New energy sources like tidal and wave energy could help meet future energy demands.

Question 35. According to the reading, why is renewable energy becoming more important?

- A. It helps reduce carbon emissions and reliance on fossil fuels.
- B. It is cheaper than fossil fuels.
- C. It is available in larger quantities than traditional energy sources.
- D. It can only be used in specific regions of the world.

Question 36. What is expected to happen with solar power in the future?

- A. Solar power will be phased out.
- B. Solar power will become more efficient and affordable.
- C. Solar power will be used less frequently.
- D. Solar power will only be used in specific regions.
