### Preparing for a natural disaster

The best way to survive any disaster is to make sure that you are prepared for it. Although there is no point preparing for an <sup>1</sup> \_\_\_\_\_ if you don't live anywhere near the mountains, or a <sup>2</sup> \_\_\_\_\_ if you live a long way from lots of trees, it's a good idea to think carefully about what risks you do face in your local environment.

- One risk that we all face today are <sup>3</sup> \_\_\_\_\_. Although computer criminals are highly sophisticated, there are some precautions we can take. These include backing up all your important files and using very strong passwords.
- If you live near a river, <sup>4</sup> \_\_\_\_\_ could be a problem after heavy rain. To prepare, move all your valuables and electrical items off the floor. Keep sandbags close by so you can place them by doors to stop water entering your house.
- For <sup>5</sup> \_\_\_\_\_, there won't be time to prepare. However, you can still plan your escape routes or the best place in your home to shelter.
- Finally, of all of these disasters, the one that will certainly affect us is the one that is happening right now, and that's <sup>6</sup> \_\_\_\_\_. And the only way to prepare for that is to adapt your lifestyle to a carbon-free future.
