

Biodiversity and Sustainability: Matching concepts

Instructions: Listen to the conversation, and match the correct concept and definition based on the information.

Column A	Column B
1. Urban sprawl	A. Tax breaks used to encourage green behavior.
2. Renewable energy	B. Results of land degradation in dry regions.
3. Carbon neutrality	C. Expansion of cities into natural habitats.
4. Subsidies	D. The damaging result of ocean acidification.
5. Coral bleaching	E. Power coming from naturally replenished sites.
6. Acid rain	F. Balancing emitted and absorbed CO2 levels.
7. Desertification	G. Precipitation caused by heavy air pollution.
8. Ecological footprint	H. The measure of human impact on our nature.
9. Green technology	I. Science focused on reducing human damage.

10. Stewardship

J. Responsible management of our environment.
