Marina Martin, a young games tester

Most days I finish my homework and then I have to play computer games for the rest of the afternoon. Yes, I have to! You see, I earn money by looking for mistakes in games.

I've always been crazy about computer games. My dad's a journalist and my mum's a photographer, so there's been a computer in the house since before I was born. I can remember playing very simple games on it when I was less than five years old and my dad telling me to switch it off and go outside.

I was online one day when I saw an advertisement from a video game company. They were looking for young people to give their opinions about some of their new games. I contacted them but I wasn't old enough because I was 14.

Three years later, several companies now send me their games. I often spend hours on the same game. I have to play it from start to finish several times, look at all the menus and try all the different ways of playing it. While I'm doing this, I take notes and then write a clear email which the company can understand easily.

You have to work quickly because the company often wants to sell their new game as soon as possible. I may have to spend a lot of the weekend testing. However, I think I'm very lucky that my hobby has become a job. Most of the time, I love it!
