

Subraya en el texto los pronombres relativos:

"Neural networks are systems that can learn from data. They are used in technologies which recognize speech and images. There is an application that translates languages in real-time, helping people communicate in countries where they do not speak the language. These networks use algorithms which improve the more they are used."

Fill in the Blanks:

1. Choose the correct relative pronoun (which, that, where) to fill in the blanks.
 - Neural networks are tools ___ help us solve complex problems.
 - A smartphone is a device ___ can recognize your face.
 - There are apps ___ help you learn languages.
