

Let's Never Stop Falling in Love / Pink Martini

I wish a could fall forever

And sparkle through the clouds and

And in the darkness of the night

The star a glimmering light

And hover above our love

Please, close and whisper that you love me

And that your dreams are only of me

When you are near, everything's clear

Earth is a beautiful heaven

Always I that we the star

And be forever floating above

I know a can't fall forever

But let's never stop falling in love

When you are near, everything's clear

Earth is a beautiful heaven

Always I that we like the star

And be forever floating above

I know a can't fall forever

But let's never stop falling in love

No, let's never stop falling in love
