Three Cars

Ruscon, family car

Ruscon has a big engine and this makes it possible to go on long trips. The car has eight seats which includes the driver's seat. There is plenty of room in the back for luggage. The seats in the back have DVD players so the children can watch films during the journey. Each seat has its own screen. This car is very cheap to run but can be a little bit expensive to buy. If you want to buy the car, the bank can lend you the money.

McLauren, sports car

McLauren is very small and can travel very fast. There is only room for two people, the driver and one passenger. There is only room for one small bag in the back of the car. You have to be rich to run this car as it uses a lot of petrol. This car is often used for racing other fast cars. It is very expensive to buy, and banks will not lend you any money to buy it.

Nican, city car

Nican is nice and very small. There are two seats in the front and none in the back. There is no room in the back for luggage but you can put two or three shopping bags behind the front seats. You don't have to spend a lot to buy this car and it's also very cheap to run. The only problem is that it is slow because it has an electric engine. It is only good for short journeys because of the battery. Car parks in the city centre are free for electric cars.

PART 3 Questions 14-18

For each question, choose the correct answer.

Teenagers and Smart Phones

Everyone knows that smart phones are very useful and, today, most of my friends at school have one in their hands all the time. Watch a group of teenagers, and you will find that instead of talking to each other, most of us are texting on our smart phones. Teenagers are always texting, and all this messaging can give us Teen Texting Tendonitis (TTT) which makes the hands, back and neck hurt.

Having a smart phone makes teenagers want to spend all day talking or texting, instead of doing things that we are supposed to do, such as our homework. Teens who spend too much of their time with their phones are always tired; they also start having other problems. In some cases, they may have headaches. This happens because most teens keep their smart phones near them while sleeping, so that they can answer texts and calls. They often feel they have to be available around the clock.

Using texting all the time as a way of communication can also make us teens worry a lot. Answering all my friends' texts can make me happy, because it makes me feel popular. However, if any of my friends take a long time to send back a text, then I can feel very sad.

A. They will be having a conversation.
