In the past people usually learnt a foreign language in order to read the literature of the country. Now speaking a foreign language is what most people want. Every year many millions of people start learning one. Some people try at home, with books and records of tapes; some use computers and network; others go to evening classes. A few people try to learn a language fast by studying for 6 or more hours a day. It is clearly easier to learn the language in the country where it is spoken. However, most people cannot afford this, and for many it is not necessary. They need the language in order to do their work better. For example, scientists and doctors chiefly need to be able to read books and reports in the foreign language. Whether the language is learnt quickly or slowly, it is hard work. Machines and good books will help, but they cannot do the student's work for him.
