2.	A. hold	B. take	C. sit	D. find
3.	A. choose	B. go	C. wait	D. board
4.	A. shout	B. shouting	C. to shout	D. shouts
5.	A. a	B. an	C. the	D. no article

II. Read the passage and choose the correct answer.

There are three major forms of fossil fuels: coal, oil and natural gas. We call them non-renewable energy sources because fossil fuels take millions of years to form and they are running out. What will happen when there is no coal, oil and natural gas on earth? Scientists are trying to find and use other alternative sources of energy. We can use energy from the sun, wind and water.

We can also save fossil fuels by conserving energy. One simple way to do this is to turn off electrical appliances that we are not using. We can also turn off lights when no one is in the room. Another way is to travel by bike or walk instead of driving cars or motorbikes.

1. What are fossil fuels?

A. Renewable energy sources B. Three major forms of energy from the sun
C. Coal, oil, and natural gas D. Electrical appliances

2. What are scientists trying to do about energy sources?

A. Increase fossil fuel production B. Ignore energy problems
C. Promote car usage D. Find alternative energy sources

3. How can people help save fossil fuels when traveling?

A. Walk or ride a bike B. Use motorbikes all the time
C. Drive cars more often D. Ignore transportation options

4. What alternative energy sources are mentioned in the text?

A. Nuclear power B. Solar, wind, and water energy
C. Coal and oil D. Electrical appliances

5. What is the main concern about fossil fuels in the text?

A. Their low-cost B. Their unlimited supply
C. They are running out D. Their easy production
