How to be a safe and smart searcher? Here are some useful tips.

**Several keywords will help to find better results.** Use more than one keyword when you search. If you want to find out about seagulls, for example, search for 'bird seagull' and not just 'seagull' – because seagull might also be the name of anything else.

**Avoid common words like 'a' or 'the' in a search.** These aren't always helpful and are usually unnecessary.

**Remove unwanted results by adding a minus symbol (-).** For example, 'seagull - hotel - film' would leave out all results related to hotels and films.

**Check your spelling.** Make sure that you spell every word in the search box correctly. The smallest typing mistakes can bring unwanted results.

**Have a filter.** It's a good idea to filter your online searches, especially for pictures. Ask an adult to help you add a filtering system.

**Exactness is important when you search on the Internet.** Always ask yourself, 'Is this reliable?' Don't make the mistake of believing everything you see. Some websites are unreliable and some information is false. Check your information before accepting it.

23. Using only one keyword is the best way to find correct search results.

24. You shouldn't add common words because they are not necessary.

25. Using the keyword 'seagull - hotel - film' will remove results connected to films and hotels.

26. Spelling errors in your search can lead to unwanted results.

27. All of the statements below are mentioned in the text EXCEPT \_\_\_\_\_.

A. Not all websites are a reliable source of information.

B. Filtering your online searches is a good choice.

C. The phrase 'bird seagull' may bring better results than just 'seagull'.
