Question 2. Read the following passage and mark the letter A, B, C, or D to indicate the answer to each of the questions.

Communication technology is making a big difference in our lives, especially for businesses. It makes things work faster and better, and it helps businesses make more money. The 5G wireless network is going to make things even better. It will let us talk to each other and to machines in almost real-time, even if we're in different places. This is because 5G is super fast, has lots of bandwidth, and is really reliable. This means we can do things like have video meetings with people who are far away and control machines from a distance.

5G and IT are also helping us create smart cities all over the world. These cities have lots of devices, like smartphones, cars, and machines, all connected to the network. The amount of information and data being transmitted over the networks will be huge, so we need to ensure that we have good ways of communicating. In the future, there will be three main types of communication: machine to machine, human to machine, and human to human.

1. How is communication technology impacting businesses? – It's _____
   A. making things slower
   B. not affecting businesses at all
   C. helping businesses work faster and better
   D. reducing business profits
2. What is the 5G wireless network expected to improve? – It will _____
   A. make things slower
   B. reduce business efficiency
   C. enable real-time communication across distances
   D. make communication less reliable
3. Why is 5G considered super fast and reliable? – Because it _____
   A. has very limited bandwidth
   B. is known to be slow and unstable
   C. has lots of bandwidth
   D. doesn't work well with video meetings
4. What are smart cities equipped with to enhance connectivity?
   A. No devices at all
   B. Devices like smartphones, cars, and machines
   C. Only computers connected to the internet
   D. Paper-based communication systems
5. In the future, what are the three main types of communication mentioned in the text?
   A. Machine to tree, machine to cloud, and human to machine
   B. Human to robot, human to dog, and machine to machine
   C. Machine to machine, human to machine, and human to human
   D. Human to cat, human to bird, and machine to cloud

Read the following passage and mark the letter A, B, C, or D to indicate the answer to each of the questions.

Like many countries, Britain has serious environmental problems. In 1952, more than 4,000 people died in London because of the smog. The government introduced new laws to stop smog from coal fires and factories and the situation **improved** a lot. Today, London is much cleaner but there is a new problem: smog from cars. In December 1991, there was very little wind in London and pollution increased. As a result, about 160 people died from pollution in just four days.

Part of the problem is the new "out of town" shopping centres. In the past, people often walked to shops near their homes or went by bus. Now, many people drive to the new shopping centres. The small shops have disappeared and more people have to travel to do their shopping.

Many people are trying to reduce the use of cars in Britain. Some cities now have special bicycle lanes, so people cycle to work. Some people also travel to work together in one car to reduce pollution and costs.

1. Which of the following statements is TRUE according to the passage?

A. The government once introduced a law against smog from cars and factories.
B. London is much cleaner than before, so nobody dies from pollution any longer.
C. Now smog in London mainly comes from cars.
D. People in cities now go to work by bicycle only.

2. Why do people drive to go shopping?

A. They prefer shops in big shopping centres outside of town.
B. Small shops near their homes have disappeared.
C. Many new shopping centres have appeared outside of town.
D. It has become popular to do shopping in large shopping centres.

3. How many examples are there in the passage of people reducing car use?

A. Two. B. Three. C. Four. D. Five.

4. The word "improved" in the first paragraph probably means

A. got worse B. reduced C. became better D. maintained

5. What is the best title for this passage?

A. Reducing the Use of Cars in Britain
B. The Disadvantages of Cars
C. How People are Reducing Smog in Britain
D. Smog in Britain: Past and Present

From watches and phones to household appliances, everything is getting smarter. Now, thanks to Apple, that's also true of your water bottle. The HidrateSpark Pro Smart Water Bottle – a mouthful, we know – takes all the guesswork out of tracking your water intake. The vacuum-insulated exterior should keep your liquids cold for up to a full day and it has a host of other neat features. Apple's smart water bottle integrates with your Apple Watch and Apple Health. It takes into account your daily steps and exercise to **calculate** how much water you need. The LED puck at the bottom of the bottle lights up to remind you when it's time for a drink and tracks how many ounces or millimetres of water you drink throughout the day, using Bluetooth. You can also get a slightly less expensive version, without the insulation, in the form of the HidrateSpark Pro Tritan Plastic Sea Glass.

1. How long can the vacuum-insulated exterior keep your liquids cold?

A. Half a day B. A full week C. 18 hours D. Up to 24 hours
