"East Luwu Government Educates 250 Participants to Build Disaster-Resilient Schools"

(Adapted into English for learning purposes | Source: Warta Luwu Timur, 27 August 2025)

[1] Lutim — In an effort to enhance awareness and preparedness in facing various disaster threats in East Luwu Regency, the Regional Disaster Management Agency (BPBD) of East Luwu, in collaboration with Basarnas, held a Disaster Prevention and Mitigation Training program for schools. The event, attended by 250 participants from educational institutions across the regency, was aimed at building a 'Disaster-Resilient District.'

[2] The training was officially opened by a representative of the Regent of East Luwu, who stated that the event was a form of local government support to collectively build capacity and disaster preparedness. 'The primary target we must protect during a disaster is the population. When we talk about disasters, the first thing investigated is how many lives were lost — because lives cannot be replaced,' the representative emphasized.

[3] The Secretary of BPBD, Jumardin, explained that the purpose of this activity is to increase participants' understanding and knowledge in identifying potential disasters, as well as to strengthen disaster preparedness and mitigation in educational units. "We hope this activity will reach every layer of society — volunteer groups, organizations, and local government — through formal and non-formal education, so that East Luwu can become a truly disaster-resilient district," he stated.
