Title: The Solar System – Summary Question

Grade: 6

Instructions: Read the question below carefully. Write your answer in complete sentences on a separate piece of paper or in the space provided.

Question:

Using complete sentences, write a summary that explains the main parts of our solar system.

In your summary, be sure to include:

1. **What is at the center of the solar system**
2. **The names of at least three different types of objects** found in the solar system (for example: planets, moons, asteroids, comets, or dwarf planets)
3. **One key feature that makes Earth unique** for supporting life

---

Bonus (optional):

Underline the sentence in your summary that gives the most important reason why Earth can support life.
