

Title:

Technological Tools in Education

Reading Text:

Technology is very important in education today. Students and teachers use many technological tools in the classroom.

Computers help students do research and complete homework. Tablets are useful because students can read digital books and watch educational videos.

Smartphones help people communicate and search for information quickly.

Teachers also use projectors to show presentations and videos during class.

Platforms like Zoom and Google Classroom help students learn online.

Technology makes learning easier, faster, and more interactive. However, students should use technology responsibly and avoid spending too much time on devices.
