tourist spot/area 	town square/hall 	traffic jam 	traffic sign 
window shopping 	power station 	housing crisis 	public transport 

# Going underground!

## New York is planning a new park - underground!

Space is limited – especially in cities like New York where an ongoing  
 1 ..... means that any spare land is quickly turned into an  
 2 ..... . Too little attention is given to spaces where people  
 relax away from city life and escape the fumes and noise from the  
 3 ..... that block the city streets every day. But now 4 .....  
 in New York have come up with a vision for a new 5 ..... that will  
 be underground. Natural light will be reflected down into the space but  
 when 6 ..... mean there's too much cloud on top, there's a backup  
 LED system for down below. The park will also contain lush green plants  
 and a 7 ..... for children to enjoy the safe, clean space away from  
 city streets. But what about the rats? Apparently, a good system of rubbish  
 removal and cleaning will keep them away!
