

BLUE GROUP – Coral Reefs

Name: _____

Read the information

Coral reefs are important ecosystems in the ocean. They provide food and shelter for many sea animals. Pollution, plastic waste, and warmer oceans can damage coral reefs. People can help protect reefs by keeping oceans clean.

1. Comprehension Questions

1. Why are coral reefs important?
2. What can damage coral reefs?
3. How can people help protect coral reefs?

2. Cause and Effect

Plastic in the ocean → _____
Clean oceans → _____
Warmer water → _____

3. Compare and Contrast

How are coral reefs and forests similar?

4. Writing Task

Imagine you are a sea turtle living near a coral reef. Write 4–5 sentences about your home.

5. Bonus Challenge

Draw and label: coral, fish, turtle, seaweed, ocean floor.
