

## Setting Out

(n) is even

$$\text{Median} = \frac{n+1}{2} \text{th score}$$

$$= \frac{8+1}{2} \text{th score} = 4.5 \text{th score}$$

$$= \frac{5\text{th} + 6\text{th score}}{2}$$

$$= \frac{6 + 7}{2}$$

Use if necessary

$$= 6.5$$

(n) is odd

$$\text{Median} = \frac{n+1}{2} \text{th score}$$

$$= \frac{7+1}{2} \text{th score} = 4 \text{th score}$$

$$= \frac{\quad + \quad \text{score}}{2}$$

$$= \frac{\quad + \quad}{2}$$

Use if necessary

$$= 7$$

## 1. Frequency Distribution Table

Score (x)	f	fx
