ROBOTS

Would you like a robot to clean your house, or play soccer with you? There is a robot from Japan that can. Its name is ASIMO and it is the first robot to walk and run like a human. ASIMO can understand human language, too.

In the future, every factory will use robots. Special robot arms already make cars, but in the future robots will make more things. Robots will also do dangerous jobs. They can also help with operations in hospitals. What jobs will humans do?

3 Answer the questions.

1. What is special about ASIMO?
2. What will every factory use in the future?
3. Will humans do dangerous jobs?
4. How can robots help doctors?

4 **Think!** What things would you like robots to do in the future?

Design a robot. What can it do? Tell your friend.
