

Every season gives people a chance to enjoy different activities. During **spring**, many families go to parks to have a **picnic** because the weather is pleasant. Beautiful **flowers** bloom everywhere, making the environment look colourful and fresh.

When **summer** arrives, children enjoy **swimming** at the pool or beach because the weather is hot and sunny. Some families also travel during the school holidays.

In **autumn**, the weather becomes cooler, and strong winds may blow leaves around. People enjoy watching the colourful trees and taking walks outside.

During **winter**, some countries experience snowfall. Children wear thick clothes and enjoy building a **snowman** with their friends and family.
