Read the following passage and circle the letter A, B, C or D to indicate the correct answer to each of the questions from 39-45. (1.4 points)

The Role of Robots in the Modern World

Robots are becoming an essential part of modern life, transforming the way people work and live. **They** are used in various fields, from manufacturing and healthcare to space exploration. In factories, robots assemble products quickly and accurately, reducing the need for human labor. In hospitals, robotic arms assist in delicate surgeries, making procedures safer and more precise. As technology advances, robots are expected to take on even more complex tasks.

One of the most debated topics about robots is their impact on jobs. While robots help increase efficiency, they also replace certain jobs that humans traditionally performed. Many experts argue that automation will create new job opportunities, but others worry that it will leave many people unemployed. Despite these concerns, companies continue to invest in robotics to improve productivity and reduce costs.

Robots are also being designed for personal and household use. Smart home assistants, robotic vacuum cleaners, and even robotic pets have become popular. These machines make daily life more convenient, handling routine tasks such as cleaning, scheduling, and even providing companionship. In the future, robots might become even more integrated into human lives, assisting with elderly care and education.

However, despite their benefits, robots still have **limitations**. They lack human emotions, creativity, and problem-solving abilities. While they can perform repetitive and precise tasks, they struggle with understanding feelings or making ethical

LIVEWORKSHEETS

decisions. Scientists and engineers are working to improve artificial intelligence, but it is unlikely that robots will fully replace human workers in areas that require emotional intelligence, such as teaching or counseling.

39. What is the passage mainly about?
