___/5

READING

7 Przeczytaj tekst. Na podstawie informacji w nim podanych uzupełnij zdania 1–5.

Gabriela

★★★★★

The London Science Museum is home to thousands of objects from around the world that show the history of science and technology. It was my first visit to the museum and I'm sure it wasn't the last one. And it's not only because you get to most of the galleries for free.

There are a lot of sections located in two buildings. My favourite part was the *Exploring Space* gallery. It has real rockets, satellites and the clothes astronauts wear in space. There's also a replica of *Eagle*, the Moon lander – it wasn't in space, but it looks like a real spaceship. The *Flight* gallery was also amazing. You can see Amy Johnson's real plane there. She was the first woman to fly alone from the UK to Australia in 1930.

The museum has also one of the best 3D cinemas in Europe and a special place called *Power up* with 160 games consoles from the past 50 years. Take your friends and play the best video games of all times there.

- There are _____ of things from different countries in the museum.
- It was Gabriela's _____ visit to the museum.
- Eagle*, the Moon lander _____ a real spaceship.
- Amy Johnson was a _____.
- Power up* is a place for people who love _____.
