

READY FOR C2 - TEST UNITS 3 & 4

1. Choose the correct options to complete the blog post.

A must-not see

To say I was looking forward to seeing the latest film by Robert Wilmer is an understatement. He's been **(1)** *on / in / under / at* the forefront of action cinema for years and I'm a big fan of all of his films, so the sequel to *Walking on Mars* was top of my list.

I'll start with what's good about *Walking on Mars: The Return*, because, quite frankly, it won't take long. Hats off to Diane Ronald. Her acting is **(2)** *in / on / under / at* a par with the first film, and that's impossible to fault. I'm quite simply **(3)** *at / under / in / on* awe of her as an actress and would go so far as to say she's one of the greatest of our generation.

Now the hard part. The film has been **(4)** *in / on / under / at* scrutiny since it opened at the cinemas last week. The flaws in the plot are blindingly obvious to anyone, many of the jokes are **(5)** *at / under / in / on* poor taste, and apart from Ronald, there is some questionable acting **(6)** *under / at / in / on* display. **(7)** *On / Under / In / At* retrospect, I have to say that the soundtrack wasn't as bad as I first thought. That's not to say I'm rushing to put it on my playlist, however.

All in all, sequels rarely live up to the original and it's fair to say that this one would have put any thoughts for a third film **(8)** *on / at / in / under* jeopardy!

2. Read the text below. Use the word given in capitals to form a word that fits in the space. There is an example at the beginning.

The future of printing

Scientists are forever trying to think up new and **(0)** INVENTIVE **(INVENT)** ways to reduce the number of trees that are cut down every year. And they may just have come up with one particularly clever **(1)** _____ **(SOLVE)**.

The de-printer is a(n) **(2)** _____ **(ORDINARY)** gadget that is able to literally suck ink off paper. In turn, the paper can be reused up to ten times.

A **(3)** _____ **(SPECIAL)** coated material is used on the paper meaning the ink can't be absorbed into the page. Once the page has been printed and read, a **(4)** _____ **(POWER)** laser vaporises the ink.

Barak Yekutiely, the man behind the project, also explains that the process can go one step further. 'What's left is just pigments of the ink which we collect and those can be **(5)** _____ **(CYCLE)** back into new printer inks', he said.

And the good news is that existing printers could have this device alongside their **(6)** _____ **(CONVENTION)** printer. This would mean that the **(7)** _____ **(TRANSFORM)** of printed paper to plain paper could be done **(8)** _____ **(RELATIVE)** easily.

3. **Read the text below and think of the word which best fits each space. Use only one word in each space. There is an example at the beginning.**

The Brompton Bike

Back in the late 19th century, the original safety bike was invented, that is, the type of bike we still see today. (0) SO perfect was its design that it remained relatively unchanged until the late 70s. That's when Andrew Ritchie patented his design for a new type of bicycle, a folding model, which he called the Brompton. (1) _____ to what some people think, the Brompton wasn't named (2) _____ anything related to cycling, but rather after the London cemetery Ritchie could see while he was working on it.

(3) _____ not having access to computers, Ritchie managed to design the complex geometry required for his folding bike on his kitchen table. Initially, production was slow (4) _____ a result of a lack of funding, but this all changed in 1988 and his company was able to start full-scale production.

So, (5) _____ made the Brompton so innovative and how has it remained largely unrivalled to this day? To (6) _____ intents and purposes, it was the first truly successful folding bike due to three key elements: it's handmade, well-engineered and well-designed. On top of (7) _____ the bike's resale value is incredibly high.

Today, Brompton is the biggest maker of bicycles in the UK. The company also exports to more than 40 different countries, which account (8) _____ 80% of sales.

4. **Choose the correct options to complete the sentences.**

- In the negotiating room, there was a *grain / glimmer* of hope as both parties finally found common ground on the contentious issue.
- The new collaborative approach brought a *hint / breath* of fresh air to the workplace.
