

SUMA DE FRACCIONES HETEROGÉNEAS

Nombre: _____ Curso: _____

Fecha: _____

Instrucciones: Suma las fracciones heterogéneas. Escribe el resultado en su forma irreducible. Si puedes simplificar, completa los recuadros de simplificación.

- 1 $\frac{1}{2} + \frac{1}{3} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 2 $\frac{2}{3} + \frac{1}{4} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 3 $\frac{3}{4} + \frac{2}{5} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 4 $\frac{2}{5} + \frac{3}{10} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 5 $\frac{1}{6} + \frac{5}{8} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 6 $\frac{2}{7} + \frac{3}{14} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 7 $\frac{3}{5} + \frac{2}{15} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 8 $\frac{1}{4} + \frac{3}{6} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 9 $\frac{5}{9} + \frac{2}{3} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 10 $\frac{2}{3} + \frac{5}{6} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$

RESTA DE FRACCIONES HETEROGÉNEAS

Nombre: _____ Curso: _____

Fecha: _____

Instrucciones: Resta las fracciones heterogéneas. Escribe el resultado en su forma irreducible. Si puedes simplificar, completa los recuadros de simplificación.

- 1 $\frac{3}{4} - \frac{1}{2} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 2 $\frac{5}{6} - \frac{1}{3} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 3 $\frac{7}{8} - \frac{1}{4} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 4 $\frac{3}{5} - \frac{1}{10} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 5 $\frac{2}{3} - \frac{1}{6} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 6 $\frac{5}{12} - \frac{1}{4} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 7 $\frac{2}{7} - \frac{1}{14} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 8 $\frac{3}{4} - \frac{2}{5} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 9 $\frac{4}{9} - \frac{1}{3} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
- 10 $\frac{5}{6} - \frac{1}{2} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$
