Read the passage and answer the questions.

Planet Protectors

Planet Protectors are students who protect the environment every day. They save energy by turning off lights and computers when they are not needed. They reduce waste by recycling plastic bottles and reusing old paper. At school, they use less water and avoid too much plastic packaging. Do you use reusable bags at home? They also go on clean-up walks and pick up litter. Their teacher tells them to follow instructions carefully and move around the park by collecting trash. They believe small actions can make a big difference on Earth. They also encourage their friends to protect nature by joining green activities at school.
