PECAHAN SENILAI

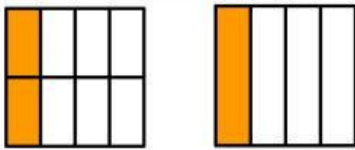

Isilah titik-titik di bawah ini dengan
bilangan pecahan sesuai derah yang
diarsir!

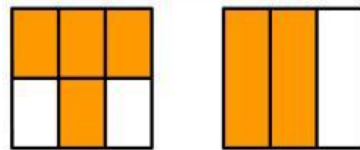

$$\frac{4}{8} = \frac{1}{2}$$

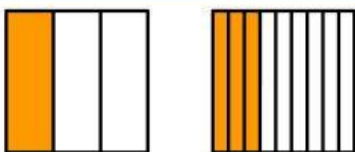

$$\frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{\square}{\square} = \frac{\square}{\square}$$

Contoh :

$\frac{4}{8}$ senilai dengan $\frac{1}{2}$ karena $\frac{4}{8}$

sama-sama dibagi 4 pada bagian penyebut dan pembilangnya.
