EXERCISE 1: LINKING IDEAS

Some people believe that the increasing use of artificial intelligence (AI) tools such as ChatGPT will improve students' learning outcomes. To what extent do you agree or disagree?

Introduction

The use of artificial intelligence tools such as ChatGPT has become increasingly common in educational settings. While many people argue that these technologies can enhance learning, I completely disagree because they may reduce students' critical thinking skills and create excessive dependence on technology.

Body Paragraph 1

Choose the correct connectors (from the options) to link ideas coherently: *For example, This is because, First, In addition, Consequently*

_____, AI tools can negatively affect students' ability to think independently. _____ learners can obtain answers instantly without engaging in deep analysis or problem-solving. _____, students may rely on ChatGPT to generate essay ideas, summarize articles, or complete assignments instead of developing their own arguments. _____, the availability of automated feedback may discourage learners from carefully reviewing and reflecting on their mistakes. _____, students may become passive learners and struggle to develop the analytical skills required for academic success.

LIVEWORKSHEETS

Body Paragraph 2

Choose the correct connectors (from the options) to link ideas coherently: This is due to, For instance, Additionally, As a result, Another reason

_____*why I oppose the increasing use of AI in education is that it can create an unhealthy dependence on technology.* _____*the convenience and speed with which AI provides information and solutions.* _____ *students may gradually lose motivation to conduct independent research or evaluate information critically.* _____ *instead of consulting multiple sources, learners may simply accept AI-generated responses without questioning their accuracy or reliability.* _____ *their digital literacy and information evaluation skills may not develop sufficiently, making them less prepared for complex real-world situations.*

Conclusion

In conclusion, I completely disagree that the growing use of AI tools will necessarily improve students' learning outcomes. Although these technologies offer convenience, they can weaken critical thinking skills and encourage excessive reliance on technology, which may ultimately hinder long-term educational development.

EXERCISE TWO: IDEA DEVELOPMENT

DRAG AND DROP SENTENCES IN THE OPTIONS INTO THE CORRECT PLACE (BOX) TO COMPLETE THE PARAGRAPHS

Some people believe that the increasing use of artificial intelligence (AI) tools such as ChatGPT will improve students' learning outcomes. To what extent do you agree or disagree?

Introduction

The growing use of artificial intelligence tools in education has transformed the way students learn and access information. While some people are concerned that AI may discourage independent thinking, I completely agree that it can significantly improve learning outcomes because it provides personalized learning opportunities and enhances students' digital literacy and access to educational resources.

LIVEWORKSHEETS

Body Paragraph 1 (Put the sentences in the box into the correct order! Write the capital letters in the space provided!)

First, ... ( )

This is because..... ( )

For example, ... ( )

In addition, ... ( )

Consequently, ... ( )

A. AI systems can analyse learners' strengths and weaknesses and deliver materials that are appropriate for their current level of understanding.
B. platforms powered by AI can recommend additional exercises to students who struggle with specific grammar or mathematical concepts while allowing advanced learners to move at a faster pace.
C. AI can improve learning by providing personalized learning experiences that meet the individual needs of students.
D. learners can make faster progress and become more confident in their studies.
E. many AI applications provide automated feedback, enabling students to identify and correct mistakes immediately rather than waiting for a teacher's response.

LIVEWORKSHEETS

Body Paragraph 2 (Put the sentences in the box into the correct order! Write the capital letters in the space provided!)

Another reason is that …. ( )

This is due to the fact that .. ( )

Additionally, …. ( )

For instance, …… ( )

As a result, …… ( )

A. students can become more autonomous learners and better prepared for future academic and professional environments.
B. AI can provide instant explanations, examples, and learning resources that encourage students to explore topics more deeply.
C. students increasingly need to evaluate digital information, use online tools responsibly, and interact effectively with modern technologies.
D. the use of AI in education helps students develop digital literacy, which is an essential skill in today's technology-driven world.
E. a student preparing for an IELTS examination can use ChatGPT to generate practice questions, receive writing suggestions, and review vocabulary independently.

Conclusion

In conclusion, I completely agree that AI tools such as ChatGPT can improve students' learning outcomes. By offering personalized learning and automated feedback while simultaneously strengthening digital literacy skills, AI has the potential to make education more effective, accessible, and relevant to the needs of modern learners.
