

Technology in Modern Education

Technology has become an essential part of education around the world. Many schools have introduced computers, tablets, and online platforms to help students learn more effectively. These tools allow students to access information quickly and communicate with teachers and classmates more easily.

One of the biggest advantages of technology is that students can learn from almost anywhere. During recent years, many schools have used virtual classrooms, allowing students to continue their education even when they could not attend school in person. Online resources such as educational videos, digital books, and interactive activities have made learning more engaging.

However, technology also presents some challenges. Some students become distracted by social media or online games while studying. In addition, not all students have access to reliable internet connections or electronic devices, which can create educational inequalities.

Despite these challenges, many educators believe that technology has improved learning opportunities. It has helped students develop important digital skills and has prepared them for a world where technology plays a major role in everyday life.

Reading Comprehension

Part A: Multiple Choice

1. What is the main idea of the text?

- a) Students prefer social media.
- b) Technology has advantages and challenges in education.
- c) Schools should eliminate technology.
- d) Online games are educational.

2. According to the text, what helps students learn from anywhere?

- a) Social media
- b) Homework
- c) Virtual classrooms
- d) Television

3. What challenge is mentioned in the text?

- a) Students do not like technology.
- b) Teachers cannot use computers.
- c) Students may become distracted.
- d) Schools do not have classrooms.

Part B: True or False

4. Technology allows students to communicate more easily.

5. Every student has access to reliable internet.

6. Technology has helped students develop digital skills.

Part C: Short Answer

7. Name two technological tools mentioned in the text.

8. Why do some educators believe technology is beneficial?

Vocabulary in Context

9. What does the word "engaging" most closely mean in paragraph 2?

- a) Boring

b) Interesting

c) Difficult

d) Expensive

10. What does the word "reliable" mean in the text?

a) Expensive

b) Fast

c) Dependable

d) Modern
