Read the passage – *Multiple choice*

Artificial intelligence is changing the way students learn. Some AI tools can explain grammar, suggest new words, check pronunciation, and create practice questions. These tools are useful because they give quick feedback and allow learners to study at their own speed. For students who are shy in class, practising with a digital assistant may also make them more confident.

Nevertheless, AI tools cannot replace teachers. A teacher understands students' emotions, notices their habits, and chooses activities that fit the class. In addition, students may become passive if they ask AI for every answer. They need to check information carefully because AI can sometimes give ***inaccurate*** or unsuitable responses.

The best approach is to use AI as a study partner. Students can ask for examples, practise speaking, and review mistakes. However, they should still think independently, take notes, and discuss difficult points with teachers and classmates. Responsible use of technology can make learning more effective.

1. What is the passage mainly about?

   A. Why AI should replace teachers

   B. How AI can support learning if used responsibly

   C. Why students should stop using technology

   D. How to build an AI tool

2. AI tools can help students by:

   A. giving quick feedback B. doing all exams for them

   C. replacing all books D. removing teachers

3. Why can AI not replace teachers?

   A. Teachers never use technology.

   B. Teachers understand emotions and class needs.

   C. AI is always correct.

   D. Students dislike AI.

4. The word **"inaccurate"** is closest in meaning to:

   A. not correct B. very useful C. quick D. personal
