

Instrucciones: Calcular el perímetro y el área de las siguientes figuras.

FIGURA	PERÍMETRO	ÁREA
 15 cm	P = _____ cm	A = _____ cm ²
	P = _____ cm	A = _____ cm ²
 12 cm 6 cm	P = _____ cm	A = _____ cm ²
 11 cm	P = _____ cm	A = _____ cm ²

	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$
	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$
	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$
	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$
	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$

 9 cm	P = _____ cm	A = _____ cm²
 10 cm 6 cm	P = _____ cm	A = _____ cm²
 12 cm	P = _____ cm	A = _____ cm²
 13 cm 9 cm	P = _____ cm	A = _____ cm²
 D 20 cm d 13 cm 7 cm	P = _____ cm	A = _____ cm²

 25 cm 20 cm	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$
 5 cm	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$
 D 30 cm d 16 cm 17 cm	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$
 15 cm 10 cm	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$
 D 15 cm d 8 cm 10 cm	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$

	$P = \underline{\hspace{2cm}} \text{ cm}$	$A = \underline{\hspace{2cm}} \text{ cm}^2$
---	---	---

Instrucciones: Relacione la figura con el cálculo de su área.

$$A = b \cdot h$$

$$A = \frac{D \cdot d}{2}$$

$$A = L^2$$
