I know this is a hot take but the "let them theory" as Mel Robbins' describes it,
is very black and white. Like most over simplistic self help books, it takes
something with a k[redacted] of truth (stop fighting with reality) and acts as though
it's a magical solution to all your problems. Перекласти 1/2

People are f[redacted] and fake as fuck. I get it. Their perceptions are so easily
swayed as its filtered through whatever lens they experience life within. It
doesn't have anything to do with me but that's exactly it. I don't want people
who are inconsistent in how they choose to operate with me to have anything
to do with me. Перекласти

So I'm thinking about doing a career switch. I currently work in the legal field.
Days in the office are m[redacted] n[redacted]g. I feel like switching to the education
field. I want a more active and energetic job. Educators?? What do yall

I'm kind of learning Korean for fun & something to s[redacted]p.c[redacted] boredom. It's not
serious but it's fulfilling. Really enjoying learning Hangul because using a
different lettering system is like solving a puzzle with every word but I've just
reached the point where I'm learning that the character that makes a D sound,
also make a T sound but the S character also makes a T sound and that's after
getting over the R character also making L sound and the G character making a
K sound and now I'm like 🍷 Перекласти
