

Worksheet: Specialized Animal Cells and Their Functions

Task 1: Basic Level (Matching)

Instructions: Match the type of cell in Column (A) with its correct description or function in Column (B).

Cell Type

1. Red blood cells
2. Neurones (Nerve cells)
3. Ciliated cells

Description or Function

- A. They carry electrical signals between different parts of the body.
- B. They have tiny hairs called "cilia" to sweep mucus.
- C. Small cells with no nucleus used to transport oxygen.
