

1. Match the words with the definitions.

Running

A. Going from one place to another.

Walking

B. Going up something like a tree or a mountain.

Jumping

C. Moving very fast with your legs.

Flying

D. Going down because you cannot stay up.

Climbing

E. Moving your feet slowly.

Hiding

F. Not knowing where something is.

Losing

G. Staying where people cannot see you.

Falling

H. Moving through the air.

Moving

I. Pushing yourself off the ground with your feet.

2. Look at picture. Choose and write.

strongest

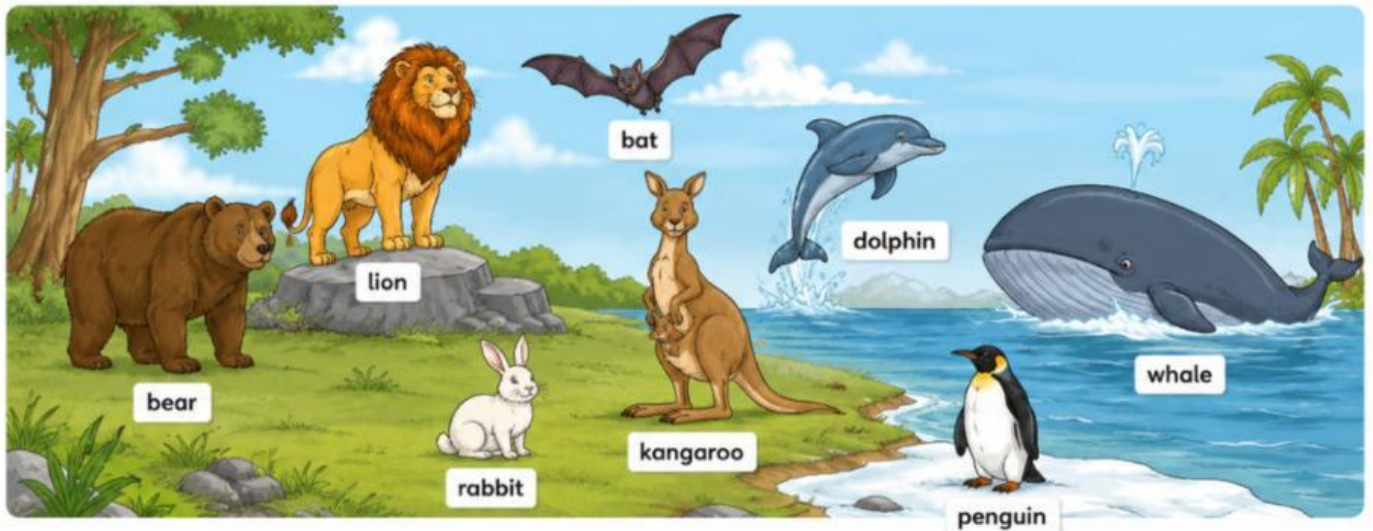

biggest

happiest

fastest

tallest

smallest

1. The blue whale is the _____ animal in the world.

2. The rabbit is one of the _____ animals in this picture.

3. The giraffe is the _____ animal at the zoo.

4. The lion is the _____ animal in the forest.

5. The kangaroo is one of the _____ animals on land.

6. The penguin is the _____ bird in the picture.

3. Read the text and answer the question.

Penguins

Penguins are special birds because they cannot fly, but they are excellent swimmers. They live in very cold places, especially near Antarctica. Their thick feathers and a layer of fat help them stay warm in the freezing weather.

Penguins spend a lot of time in the sea. They catch fish, squid, and small sea animals for food. They use their strong flippers to swim quickly through the water. On land, they walk with short steps and sometimes slide on their stomachs across the ice.

Penguins also work together to protect themselves. During winter, they stand close together in large groups to keep warm. Emperor penguins are famous because the father keeps the egg warm while the mother swims far away to find food.

People love penguins because they are friendly-looking, clever, and great parents.

1. Why do penguins stand close together in winter?

2. Who looks after the egg while the mother finds food?

3. Why do you think penguins need thick feathers?

Choose the correct answer

4. Where do penguins spend most of their time?

5. What do penguins use to swim?

6. Why do people like penguins?

7. Why do penguins stand close together in winter?

8. What does the mother penguin do while the father keeps the egg warm?

4. Look at the picture and write about it. Write 20–35 words about the picture.

Think about:

the animals you can see

where the animals are

what the animals are doing

what people can do at the zoo
