The Sydney Opera House is a multi-venue performing arts centre in Sydney, Australia, identified as one of the 20th century's most distinctive buildings.

Designed by Danish architect Jorn Utzon, the building was formally opened on 20 October 1973 after a gestation beginning with Utzon's 1957 selection as winner of an international design competition. The government of New South Wales, led by the premier, Joseph Cahill, authorized work to begin in 1958 with Utzon directing construction. The government's decision to build Utzon's design is often overshadowed by circumstances that followed, including cost and scheduling over runs as well as the architect's ultimate resignation.

The building and its surrounds occupy the whole of Bennelong Point in Sydney Harbour, between Sydney Cove and Farm Cove, adjacent to the Sydney central business district and the Royal Botanic Gardens, and close by the Sydney Harbour Bridge.

Though its name suggests a single venue, the building comprises multiple performance venues which together are among the busiest performing arts centres —hosting well over 1,500 performances annually, attended by more than 1.2 million people. Performances are presented by numerous performing artists, including four resident companies: Opera Australia, The Australian Ballet, the Sydney Theatre Company and the Sydney Symphony Orchestra. As one of the most popular visitor attractions in Australia, more than eight million people visit the site each year, and approximately 350,000 visitors take a guided tour of the building each year. The building is managed by the Sydney Opera House Trust, an agency of the New South Wales State Government.

On 28 June 2007, the Sydney Opera House became a UNESCO World Heritage Site.

Two days ago, I went to the Merapi Mountain. It was the first time I climbed the mountain. I did it with some of my friends.

We start climbing at 8 p.m. It was so dark and we only used flashlight to get the way. I felt no worry because all of my friends were experienced climber. I just followed their instruction.

We climbed slowly and enjoy the night there. After 7 hours walking in the dark, we could reach the top of the mountain. It was at 3 a.m. early in the morning. We were not alone. There were a lot of people who reached that top before us.

We waited the sun rises by cooking some food and making some hot drink to get back our energy. We sang some songs together, shared stories and got acquainted with people there.

After seeing the sun raised, we had to go back home. Getting down the mountain was not as hard as the climbing process because we only spent a few energy and time even we had to be more careful to do this process.

After all, that was my great experience I had ever have.

Also popularly known as 'Avicenna', Ibn Sina was indeed a true polymath with his contributions ranging from medicine, psychology and pharmacology to geology, physics, astronomy, chemistry and philosophy. This great scientist was born in around 980 A.D in the village of Afshana, near Bukhara, now in Uzbekistan, which is also his mother's hometown. His father, Abdullah an advocate of the Ismaili sect, was from Balkh which is now a part of Afghanistan. Ibn Sina received his early education in his home town and by the age of ten he became a Quran Hafiz (he had memorized the Quran). He had exceptional intellectual skills which enabled him to overtake his teachers at the age of fourteen.

At the age of sixteen he dedicated all his efforts to learn medicine and by the time he was eighteen gained the status of a reputed physician. During this time, he cured Nuh II, Ruler of the Samanids, of an illness in which all the renowned physicians had given up hope. On this great effort, the Amir wished to reward him, and the young physician requested consent to use his exclusively stocked royal library.

Avicenna's most important contribution to medical science was his famous book Al Qanun Fi Al-Tibb (The Canon of Medicine), known as the "Canon" in the West. This book was an immense five-volume encyclopedia of medicine including over a million words. It comprised of medical knowledge available from ancient and Muslim sources. This book was translated into Latin in the twelfth century and was used as the standard medical text in European universities until the mid-seventeenth century.

His other major work was "The Book of Healing", a scientific and philosophical encyclopedia. This book was intended to 'heal' the soul. It was split into four parts: logic, natural sciences, mathematics and metaphysics. In his book, he developed his own system of logic, Avicennian logic.

Two frogs had lived in a village all their lives. They thought they would like to go and see the big city that was about ten miles away.

They talked about it for a long time and at last they set off to the city.

It was a hot day, and they soon began to feel tired. They had only gone a little way when one said to the other, "we must be nearly there, can you see the city?" "No," said the other frog, "but if I climb on your back I might be able to see it."

So he climbed up on the back of the other frog to see the city.

Now when the frog put up his head, his eyes could only see what was behind. And not what was in the front. So he saw the village they had just left. "Can you see the city?" asked the frog who was below. "Yes," answered the frog who had climbed up. "I can see it. It looks just like our village."

Then the frogs thought that it was not worthwhile going any further. They went back and told the frogs in the village that they had seen the city, and it was just like theirs.

A mother and a baby camel were lying around, and suddenly the baby camel asked, "mother, may I ask you some questions? The mother said, "Sure! Why son, is there something bothering you? Baby said, "Why do camels have humps?" The mother said, "Well son, we are desert animals, we need the humps to store water and we are known to survive without water".

Baby said, "Okay, then why are our legs long and our feet rounded?" The mother said, "Son, obviously they are meant for walking in the desert. You know with these legs I can move around the desert better than anyone does!" Baby said, "Okay, then why are our eyelashes long? Sometimes it bothers my sight". Mother with pride said, "My son, those long thick eyelashes are your protective cover. They help to protect your eyes from the desert sand and wind".

Baby after thinking said, "I see. So the hump is to store water when we are in the desert, the legs are for walking through the desert and these eyelashes protect my eyes from the desert. Then, what in god's name are we doing here in the Zoo!?"

Pigeon refers to all birds of the family Columbidae and order Columbiformes. They consist of 310 species. Some people may also know them as "Doves". There is no clear distinction between the use of the word "pigeons" and "doves" until today. But generally, the word "Pigeons" is used to address the species known as the Rock Dove, while the word "Doves" is used to address a pigeon that is white.

Pigeons exhibit various size and colour based on their species. The smallest species may have the size of 15 cm and weight 30 g, while the largest species can grow up to 75 cm with the body weight of 2 kg. Some of their colour are: pale grey, white, brown, reddish and black. Most of them have two black bars on their wings. They have a small head with short beak. Their body is compact with two large and muscular wings and two short legs on it.

Pigeons can be found almost in any region in the world. They have been domesticated since 10.000 years ago. Last year my family and I went to Bunaken island. We got to the island by boat that we rent in Manado. It took about 50 minutes to get to the island by boat from Manado. We stayed in the island for two days where we got to experience snorkelling and diving.

We departed from Manado at 7 a.m. by speed boat and arrived at the island at 8 a.m. Then we continued our journey by car. The car was a service from the hotel where we stayed during our vacation in the island.

After checking in at the hotel and put all of our belongings in our room, we rent an ATV bike and rode it to the beach. When we arrived at the beach, my father and I went snorkelling. I saw a lot of colourful fish and coral. After sightseeing the beautiful scenery down the sea, I walked back to the beach to get my GoPro camera to get some records of the scenery.

It was a such wonderful vacation and we planned to visit the island someday.
