

BICYCLE *evolution*

Penny Farthing

Was fast but unsafe, had big wheel in front and small one behind. Used a horn to warn people it was passing.

Ariel

It had solid big rubber tires, hollow steel frames and a center steering wheel.

Michaux

Riding machine with bigger wheels. Used pedals directly in the front wheels as a means of propulsion.

Bone Shaker

It was made entirely of wood and metal tires were added which made it extremely uncomfortable.

Laufmaschine

The driver pushed his feet against the ground to make it go (it had no pedals).

Dandy Horse

It had bigger wheels and a horizontal bar that united them below.
