

Childhood Friends

By Teacher Izebel

Daniela, Jose, and Benito are very good friends since they were children. They love to play volleyball and computer games together after university. They look very different, but some people think they are related because they get along quite well.

They all have short hair, but Daniela's hair is a little longer. She has wavy brown hair and brown eyes. Her face is round. She is extroverted and likes to make things with clay using her hands. She is also very good at playing videogames, those hands know how to use a controller!

Jose is very tall. He has straight blond hair and green eyes. His legs are very long, which helps him run fast on the volleyball court. When he runs, he moves his arms back and forth. He's introverted, but very athletic. He's not as good as Daniela when it comes to play videogames, but he enjoys spending time with his friends.

Benito is not as tall as Jose. He has black curly hair and brown eyes. His face is more triangular than Daniela's. Benito is the smartest of them, always gets good grades and enjoys listening to music. He's funny, Jose always laughs at him because he opens his mouth when playing volleyball.

They think their friendship is very special and all of them want to be friends until they are old and grey.
