

1. What are the 2 Dimensions of a 2D shape?
2. What dimension is added in a 3D shape?
3. A cube has _____ vertices, _____ edges and _____ faces.
4. A triangular prism has _____ vertices, _____ edges and _____ faces.
5. Which two shapes make up a Cone?
6. How many straight sides does a Decagon have?
7. How many curved sides does a Cylinder have?
8. What is a quadrilateral?
9. If you have to put together a rectangle and a triangle. What 3D shape would you get?
10. How many sides does a Octagon have?
