Here are some things you can do, depending on the type of file you're downloading:

First: Open the file to view it, but don't save it to your PC.

Second: Save the file on your PC in the default download location. After Internet Explorer runs a security scan and finishes downloading the file, you can choose to open the file, the folder it's stored in, or view it in Download Manager.

Third: Save as a different file name, type, or download location on your PC.

Fouth: Run the app, extension, or other file type. After Internet Explorer runs a security scan, the file will open and run on your PC.

Finally: Cancel the download and go back to browsing the web.
