# SAVING THE ENVIRONMENT

The environment is very important because it gives us clean air, water, and a place to live. However, human activities such as throwing away too much waste, using too much plastic, and wasting energy are causing many environmental problems. These actions create pollution and harm the Earth. Everyone can help protect the environment by making simple changes every day.

**First**, we should reduce waste by using reusable bags and water bottles instead of single-use plastic items. We should also **recycle** paper, plastic, and glass whenever possible. Recycling helps reduce the amount of rubbish and pollution.

**Another way** to protect the environment is by saving water and electricity. We should turn off the tap while brushing our teeth and switch off lights and fans when they are not in use. Planting trees and keeping our school clean are also good ways to help the Earth. If everyone works together, we can make our world cleaner, greener, and healthier for the future.

## Reading Activity: Find the Main Ideas and Supporting Details

**Instructions:** Read the passage carefully. Then, identify 2 main ideas and 3 supporting details from the passage. Write your answers in the spaces provided.

### Main Ideas (2)

1. \_\_\_\_\_

2. \_\_\_\_\_

### Supporting Details (3)

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_
